

250kW POWER GENERATION

Honeywell's new 250kW generator will set the new industry standard for compact, continuous high-power density

Speed

15,000 - 21,000 RPM

Design Efficiency

95% at rated load

Cooling

Oil conduction and spray

Compact Design

Approximately 12 x 12 inches

BENEFITS

- Highest power density in industry
- Generator weighs 75 lbs
- AC Power System: Generator + Generator Control Unit (80 lbs total)
- Capable up to 240 VAC (1050 Hz)
- DC Power: Includes AC System + Advanced Rectifier (90 lbs total)
- Capable of 300VDC or 600VDC
- Efficiency 95%
