LITE LINK

New datalink option offers big benefits in an affordable package

Now Honeywell Forge offers a new, low-cost datalink plan called Lite Link. This new service package is designed for business and general aviation operators who fly less frequently. Lite Link provides basic communication services in the cockpit. It also reduces pre-flight pilot workload by uploading flight plans directly into the aircraft’s flight management system.

COMPARISON CHART

FEATURE	WORLDWIDE DATALINK	LITE LINK
