PRESSURE TRANSDUCERS AND BAROMETERS

A world leader in pressure stability and accuracy over temperature
Honeywell Delivers Advanced Pressure Transducers and Barometer Solutions

Honeywell’s Precision Pressure Transducers and Barometers are known for their exceptional accuracy and stability.

These transducers combine industry leading technology and reliability in extreme conditions and a variety of small packages with flexible configurations optimized to your application.

The ability to provide exceptionally accurate pressure readings over a wide temperature range, coupled with many advanced features and a compact rugged design, makes Honeywell’s precision pressure transducers among the highest value, most versatile solutions available. Our transducers and barometers are designed to function optimally in a wide variety of environments whether on land, sea or in the air.

We build all Honeywell products with our Total Quality Management (TQM) commitment, which means we do more than just supply products for your needs – we aim to exceed expectations. Plus, all our products are backed by Honeywell, recognized as a global leader in sensor manufacturing, technology and quality.

Transducers with a Smart Sensor Design

Honeywell combines nearly fifty years of experience in world leading, silicon piezoresistive pressure sensors with advanced technology to offer digital, networkable pressure transducers with exceptional accuracy.

Honeywell’s proprietary smart sensor is the heart of our transducers and barometers, gathering and translating pressure into stable, accurate readings. We designed our sensors using a micro-electro-mechanical system (MEMS) silicon die with integrated piezoresistive strain gauges to perform exceptionally in even rugged environments. Our transducers integrate microprocessors, standard bus interface electronics and many software features to allow you to customize them to fit a variety of applications. This flexibility enables analog as well as digital output readings. You benefit from the Honeywell quality, expertise and innovation to provide high accuracy pressure readings in a wide variety of applications.

Honeywell Aerospace Plymouth

Under one facility, Honeywell Aerospace Plymouth provides a state-of-the-art semiconductor foundry and design engineering services for a single customer interface, to create, produce, and deliver leading pressure transducer solutions according to your needs.

### Honeywell Precision Pressure Transducer 2 (PPT2)
- Description: The PPT2 is Honeywell’s next generation pressure transducer designed with enhanced features that result in higher resolution and tighter accuracy performance over a wider temperature range.
- Pressure Type: Absolute, Gauge, Differential
- Pressure Range: 5 standard ranges 2 to 20 PSI
- Total Digital Error: ±0.075% FS Max
- Analog Output: 0 – 5 VDC (16-bit)
- Long Term Stability: 0.025% FS Max per year typical
- Media: Dry
- Operating Temperature Range: -40° to 85°C
- Customizable Fittings: Yes
- Power Supply: 6 – 34 VDC, 50 mA max
- Weight: 4.4 oz (125 g)
- RoHS Compliant: Yes
- Export Classification: EAR99

### Honeywell Precision Pressure Transducer (PPT)
- Description: The PPT pressure transducer provides digital output and temperature compensation in a compact, rugged design with many software features that support a wide range of applications.
- Pressure Type: Absolute, Gauge, Differential
- Pressure Range: 7 standard ranges 1 to 50 PSI
- Total Digital Error: ±0.10% FS Max
- Analog Output: 0 – 5 VDC (12-bit)
- Long Term Stability: 0.025% FS Max per year typical
- Media: Dry
- Operating Temperature Range: -40° to 85°C
- Customizable Fittings: Yes
- Power Supply: 5.5 – 30 VDC, 30 mA max
- Weight: 5 oz (142 g)
- RoHS Compliant: No
- Export Classification: EAR99

### Honeywell Precision Barometer (HPB)
- Description: The HPB provides a high-value solution for accurate and stable barometric pressure measurements.
- Pressure Type: Absolute
- Pressure Range: 500 to 1200 hPa
- Total Digital Error: ±0.4 hPa Max
- Analog Output: N/A
- Long Term Stability: 0.25 hPa Max per year typical
- Media: Dry
- Operating Temperature Range: -40° to 85°C
- Customizable Fittings: Yes
- Typical Applications: Remote Meteorological Stations, Data Buoys, Environmental Data Logging, Meteorology, Airborne Measurements, Airports
- Power Supply: 6 – 26 VDC, 9 mA max
- Weight: 5 oz (142 g)
- RoHS Compliant: No
- Export Classification: EAR99

---

1. These specifications are provided for product comparisons and may be updated at anytime by Honeywell. Check product datasheets at [www.pressuresensing.com](http://www.pressuresensing.com) for current information.
2. Total Error is the sum of worst case linearity, repeatability, hysteresis, thermal effects and calibration errors over the operating temperature range.
3. Suitable for non-condensing, non-corrosive, and non-combustible gases.
