

WE HAVE LIFT OFF

Advantage Future Tech (AFT) is proud to have been appointed a primary global distribution partner for Honeywell TPE331 engine detail spare parts. Serving TPE331 operators and independent service centers worldwide from offices in Switzerland, Singapore and the USA, AFT will ensure you have the right new parts available to keep your operation flying in the skies and on the balance sheet.

Under the 10-year agreement, Honeywell has appointed AFT as a primary global* distributor of all new detail spare parts for the TPE331 engines to provide a one-stop shop inventory and distribution services for operators and independent service centers worldwide. The distributorship includes new parts only for Air Transport & Regional (ATR) and Business & General Aviation (BGA) aftermarket segments worldwide, effective immediately. Honeywell Authorized Service Centers, aircraft Original Equipment Manufacturers (OEMs), engine conversion centers (ECC) will continue to transact with Honeywell directly for parts supplies.

Selecting 100% genuine Honeywell new parts will help improve your operations through superior performance, enhanced reliability, and improved dispatch rates. No one else can bring you the peace of mind and operational efficiency that our quality delivers.

The TPE331 is one of the most reliable and proven turboprop engines in the world. With this distribution agreement with AFT, customers will always have immediate access to parts and components, when time is critical in any mission.

* Excluding Japan, government or military contracts.

HOW TO ORDER

All orders for new Honeywell parts for the TPE 331 included under the agreement should be placed directly with AFT from the Effective Date until further notice. Purchase orders to AFT must contain the following information:

- Purchase Order number
- Part Numbers
- Aircraft type, Serial Number, and Registration
- Complete end-user name and address
- Shipping method and account
- An appropriate requested date
- Correct pricing (if any)
- Work scope and reference to any applicable Honeywell Sales Bulletin, Special Pricing or Program
- All enquiries regarding order status should be directed to AFT

Honeywell

 **ADVANTAGE**

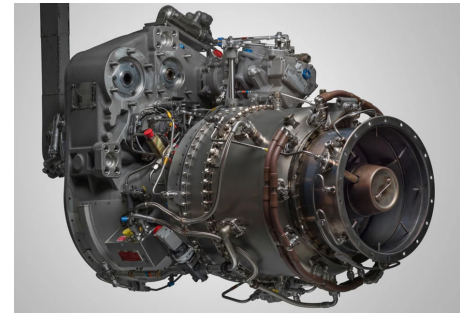

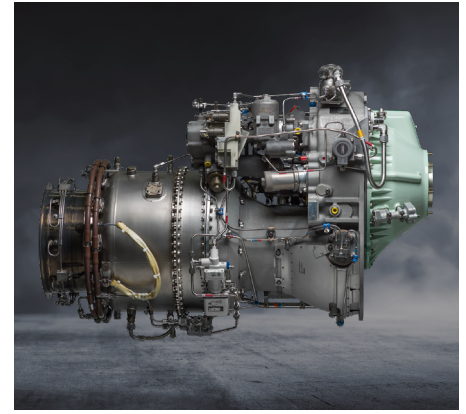

HONEYWELL TPE331

Honeywell's TPE331 is one of the most reliable and proven turboprop engines in the world.

Pilots flying TPE331-powered aircraft enjoy exceptional horsepower response and best-in-class fuel economy. Additional TPE331 benefits include quick throttle response for shorter take-offs, good power-to-weight ratio and long maintenance intervals.

Several conversion programs are available to enable aircraft to:

- Take off shorter
- Climb faster
- Cruise farther or faster
- Improve fuel efficiency
- Lower overall operating costs

ABOUT ADVANTAGE FUTURE TECH (AFT)

AFT is a global distributor of OEM turbine engine parts, avionics, satellite connectivity and UAS and UAM product portfolios, covering all aftermarket segments. Stocking parts at warehouses in Singapore and USA and with over 65,000 parts in stock, AFT offers same-day shipping with a 95% fill rate with 24/7 on call AOG assistance.
