

Primus Elite® 875 / 885 Display Upgrade

Add Value to Your Aircraft and Bottom Line

Specifically designed for Primus® 1000/2000/2000XP,
SPZ-8400/8500 and some SPZ-8000 avionics systems

Easy Installation

15

Less than 15 days
average for aircraft
downtime

The Honeywell DU-875 / 885 display upgrade replaces obsolete cathode ray tubes with modern liquid crystal displays. The display units are designed with “plug and play” functionality for easy replacement. They are brighter, last longer, and provide the capability to later add operational features as part of Primus Elite Upgrade and Primus Elite Advanced Features.

Lower System Weight

Savings of 7 lbs. per
installed display unit

Higher Performance

2x

Improved display
reliability over older CRT
technology

Increased Aircraft Value
