CARBON CAPTURE PLANT WITH HONEYWELL TECHNOLOGIES

Honeywell CO₂ Solutions
enable more than
90% EMISSION
reduction from energy and
industrial CO₂ point sources

For a typical power plant (650 W
capacity), applying carbon-capture
technology would capture
3.4 MILLION TONS
of CO₂ annually, equivalent to
removing nearly 735,000 cars from
the road each year

CO₂ STORAGE AND SEQUESTRATION

With thousands of power and industrial plants operating
around the world, we can make a significant impact on
emissions today.
