

# JETWAVE™ CONNECTIVITY SOLUTION

The dawn of the connected military aircraft has arrived with Honeywell's JetWave satellite communications system. JetWave is the only way military operators can access the Inmarsat Global Xpress satellite network for fast, seamless and reliable Ka-Band connectivity anywhere they fly. JetWave is interoperable with military Ka-Band networks and provides the best-available situational awareness for both manned and unmanned platforms, in the battlespace or during humanitarian and disaster recovery situations. It features steerable beams and a redundant ground infrastructure to keep operators continuously connected at speeds up to 25 times faster than the next-best option.

## Data Speeds

**Iridium**  
2.4 kbps

**Ku-Band**  
Up to 25 Mbps

**SwiftBroadband  
Without HDR\***  
Up to 432 kbps

**JetWave (Ka-Band)**  
Up to 50 Mbps

\*Per Channel

# Honeywell

## APPLICATIONS

## High speed airborne mission networking
