DU-875 IMPROVES SAFETY AND RELIABILITY FOR JETCITY MEDEVAC FLIGHTS

Melbourne operator gains STC to fit Honeywell avionics upgrade on Learjet 40/45s

“ Although the Learjet 45 has a very advanced cockpit, the DU-875’s liquid crystal display offers increased reliability and safety, which are two main factors of our operation. ”

Lorne Cole, founder and CEO, JetCity

Overview

When Melbourne-based JetCity wanted to extend the life of its Learjet 45s, it enlisted the support of Honeywell to gain a supplemental type certificate (STC) to upgrade the aircraft’s avionics systems with the latest DU-875 LCD cockpit displays. The STC means JetCity can now carry out upgrades for other Learjet 40 and 45 operators.

Quick Facts

Customer

- Name: JetCity Pty Ltd
- Location: Melbourne, Australia
- Industry: Jet charter and medevac
- Website: www.jetcity.com.au

Customer results

- LCD display for greater clarity and precision
- Increased reliability and safety
- 7.7 lbs lighter for improved fuel consumption
- Extended life for Learjet 40 and 45 aircraft

Why the customer chose Honeywell

- This was an upgrade to an existing Honeywell avionics suite
