

## SKY CONNECT TRACKER III PROVIDES INVALUABLE FDM DATA FOR AIR METHODS

Helicopter Air Ambulance fleet utilizes data for Flight Data Management and Quality Assurance

“ **Honeywell is really partnering with us to develop a system that will grow with us, that does what we want it to, and provides that expanded flight data monitoring system.**”

*Teri Short, VP Engineering,  
Aviation Support Services Group, Air Methods*

### Overview

When Air Methods needed to expand their Flight Data Monitoring (FDM) capabilities for their helicopter air ambulance fleet, they reached out to their trusted supplier Masco, who recommended and installed the Honeywell Sky Connect Tracker III system. The Sky Connect Tracker III system provided Air Methods the data they needed to enhance their Flight Operations Quality Assurance (FOQA) program as well as use the data as a means for immediate troubleshooting, aircraft monitoring, and maintenance response.

### Quick Facts

#### Customer

- Name: Air Methods
- Location: Denver, CO (Corporate HQ)
- Industry: Helicopter / Air Medical Transport
- Website: [www.airmethods.com](http://www.airmethods.com)

#### Why the customer chose Honeywell

- Honeywell and Masco long-term relationship with Air Methods
- Honeywell longevity as a company
- Product scalability for updates and customization

#### Customer results

- Exceeds FDM FAA requirements for Helicopter Air Ambulance (HAA) operators
- Ability for crew to communicate via talk, text or email through Iridium network
- Tracking capabilities offers level of extra safety for pilot and crew
- Tracking capabilities via mobile App provides quicker responses to events
- Data used to enhance Flight Operations Quality Assurance (FOQA) program
