

THE POWER OF **CONNECTED**

GALAXY AEROSPACE SELECTS HAPP FOR MMEA AW139 FLEET

Avionics repair costs cut by 20-30 percent and components repaired and returned quicker

“ It is very cost-effective. The estimation on the savings is about 20 to 30 percent per aircraft. We can reduce our expenditure and we get a good and quick response from Honeywell.”

*Mohammed Jamil Samsudin,
avionics maintenance inspector, Galaxy Aerospace*

Overview

Malaysia Maritime Enforcement Agency (MMEA) maintains safety and law at sea, and provides search and rescue services in the Malaysian Maritime Zone. Air support is provided by a fleet of fixed and rotary wing aircraft including three AgustaWestland 139 helicopters that are equipped with Honeywell avionics. Maintenance for the AW139s has been outsourced to Galaxy Aerospace, which has selected the Honeywell Avionics Protection Plan (HAPP).

Quick Facts

Customer

- Name: Malaysia Maritime Enforcement Agency
- Location: Subang, Malaysia
- Industry: Government
- Website: www.mmea.gov.my

Why the customer chose Honeywell

- Avionics components need to be quickly repaired or replaced
- Requirement for predictable and manageable maintenance costs
- Introduction to HAPP from AgustaWestland

Customer results

- Cost savings of 20-30 percent per AW139 helicopter
- Minimizes the time that maintenance issues ground aircraft
- Honeywell team is supportive and responds quickly
