

# GoDirect™ ACCESS

## A Total Solution for Managing Inflight Wi-Fi Access

GoDirect™ is Honeywell's industry-leading portfolio of services and applications that provide business aviation operators, flight crews and maintenance teams with the information they need to control their services and network. GoDirect Access gives aircraft owners and operators an easy-to-use tool to manage inflight Wi-Fi access and control data costs while still letting passengers connect to the internet, wherever and whenever they fly.

### GoDirect Access Puts You in Control

Honeywell understands the challenges of providing business jet passengers with the high-speed internet access they require. Open the pipe to everyone in the cabin and watch your data costs soar. Turn off the Wi-Fi and deal with frustrated and dissatisfied customers. With GoDirect Access, Honeywell offers a solution that works on both sides of the connected aircraft equation and provides a unique tool to manage inflight internet connections on the Inmarsat Jet ConneX or SwiftBroadband network.

### Providing the Flexibility You Need

GoDirect Access gives you the flexibility to meet your passengers' needs without breaking the bank. When the service is enabled by the flight crew, passengers can access the internet through a custom portal, similar to those used by public internet providers like hotels, restaurants and airports.

## BENEFITS

- Provides full control over cabin data costs
- Enables per-device, per-leg and department billing
- Offers a free service for cabin connectivity customers
- Allows unfettered access for primary VIP passengers
- Transfers data cost directly to the passenger
- Creates a new revenue stream for owner/operators
- Provides easy-to-use vouchers
- Offers a customized splash page
- Enables access to the GoDirect portal

Billing is easy with GoDirect Access. The service provides a variety of options, including billing-per-device, which lets passengers access data plans from their individual devices, select the plan that meets their needs and pay directly for the data they use – eliminating the cost-allocation hassle for flight departments.

For corporate operators, the service can enable flight departments to allocate Wi-Fi usage costs to the individual user’s department, by letting passengers log in with unique credentials.

GoDirect Access helps you manage costs by keeping a close eye on data usage. With per-leg billing, flight crews can access an app that keeps tabs on passengers’ data use and automatically emails the information back to the flight department to keep operators informed.

GoDirect Access voucher cards are an additional feature that is exclusive to the Honeywell solution. With voucher cards, you can provide passengers with a fixed amount of data. If passengers require more data, they can purchase it without interruption to their service. GoDirect Access voucher cards are a preferred solution for operators looking to control data costs.

Operators can easily turn GoDirect access on or off depending on the mission need. Simply log into the GoDirect portal and turn GoDirect Access off when the aircraft owner is flying, then turn it on when chartering.

## The GoDirect Advantage

GoDirect is Honeywell’s industry-leading portfolio of services and applications that provide business aviation operators, flight crews and maintenance teams with the information they need to control their services and network.

Why GoDirect?	
<b>GoDirect Portal</b>	Manage your network and services to balance cost with performance
<b>GoDirect Access</b>	Control aircraft network access and prevent devices from accessing network
<b>GoDirect Filter</b>	Increase bandwidth and improve passenger experience as well as control streaming costs on high speed links.
<b>GoDirect Network App</b>	Control links, devices and services on the aircraft to maximize cabin experience
<b>GoDirect Tool Kit</b>	Simplifies troubleshooting Satcom systems reducing downtime and headaches
<b>Flight Tracking</b>	Maintain constant awareness of your aircraft’s location with real time aircraft tracking and position reporting
<b>Weather</b>	Prepare an accurate flight briefing while enjoying your coffee or while on the go with the latest weather information available on our website and mobile apps
<b>Flight Planning</b>	Save time and errors by calculating fast, accurate, flight plans globally using a sophisticated and highly integrated flight planning engine
<b>Go Direct Aircraft Datalink</b>	Travel with ease knowing your safety services and cockpit communications are covered by one of the industry leading datalink providers
