GoDirect™ Flight Sentinel
Your Personalized Dispatch and Flight Operations Center

GoDirect™ is Honeywell’s industry-leading portfolio of services and applications that provide business aviation operators, flight crews and maintenance teams with the information they need to control their services and network. GoDirect Flight Sentinel is your flight department’s premier partner, providing a range of proactive services that enhance safety, save time and money, and improve flight efficiency.

GoDirect Flight Sentinel Gets You Where You Need to Go

GoDirect Flight Sentinel makes life easier for corporate flight departments and improves the flying experience for passengers. GoDirect Flight Sentinel takes critical flight planning, flight following and problem mitigation tasks off your shoulders. We get you where you want to go, when you want to be there and help you create the “no surprises” experience you want – every flight.

Benefits

- Access to a 24/7 flight operations and dispatch center providing highly personalized support when and where you need it, 365 days a year
- An extension of the flight department, able to accommodate and learn your personal preferences
- Reduces workload allowing flight crews to focus on passenger safety and comfort
- Proactively monitors every phase of flight and keeps crews informed of hazards or delays
Custom Service with a Personal Touch
We help you overcome challenges that can plague even the best flight departments. Honeywell combines technology and good old-fashioned know-how to manage every phase of flight for you, from preflight to post flight. Our unique approach includes the best route-management capabilities in the industry to enhance safety, improve efficiency, reduce costs and ensure passenger comfort.

It all starts with the most experienced and capable team of flight control specialists in the industry. We’re available 24/7 to provide you with the highest-possible level of service – acting as a value-adding extension of your own flight department. With Flight Sentinel on your side, you have the backup you need to achieve peak performance, every flight.

We get to know you, your aircraft and your preferences in advance so that we can jump right in when you’re ready to fly. When you call, we take over, developing and filing a flight plan that takes advantage of the latest air traffic control guidance to avoid traffic congestion and weather delays.

We keep tabs on developments and changes to ensure you have an on-time departure while staying in touch with air traffic control throughout the flight. We provide you with real-time updates on weather, airport status, and safety related concerns that may impact your flight. Our ability to detect potential problems in advance provides the flexibility you need to complete your mission.

From start to finish, the GoDirect Flight Sentinel team monitors aircraft position and progress while looking ahead for weather hazards, traffic congestion, ground delays and other conditions that may affect your flight. We keep you informed with proactive communications sent to your mobile device or aircraft datalink.

With GoDirect Flight Sentinel, you have unprecedented situational awareness, which enhances safety and improves on-time performance. And GoDirect is an integrated family of services that work together to deliver the information you need when you need it.
