GoDirect™ Services

RNP Consultancy

GoDirect™ Services

RNP Consultancy

As a FAA approved consultant, Honeywell helps simplify the RNP AR approval process with Go Direct Services.

RNAV (RNP) procedures allow aircraft to fly a safer more stable approach with lower minimums using defined lateral and vertical flight paths. This enables improved access to airports with terrain challenges or airspace congestion issues.

Operational Approvals

Per FAA Advisory Circular 90-101A, operators are required to obtain approval from the FAA to fly RNAV (RNP) approaches. Operators need to show compliance by meeting the specific requirements for aircraft equipment, operational procedures, navigation database integrity and crew training.

Honeywell Aerospace

Honeywell is a leading global provider of integrated avionics, engines, systems and service solutions for aircraft manufacturers, airlines, business and general aviation, military, space and airport operations.

Honeywell helps simplify the RNP AR approval process with GoDirect Services.
