

JetWave™ Connectivity Solution

The Power of Connected. *The Power of Honeywell*

The dawn of the Connected Aircraft is here, thanks to Honeywell's JetWave satellite communications hardware, which exclusively powers Inmarsat's GX Aviation service. Gone are the days of slow, inconsistent, buffering Internet signals in aircraft cabins. Passengers around the world can now surf, stream, download and post in-flight via the high-speed Wi-Fi service powered by JetWave – service that is up to 25 times faster than the next best global Wi-Fi service.

Data Speeds

2.4 kbps
