Honeywell has brought a robust and reliable satellite communications product to the helicopter industry. The Aspire 200® System, with its High-Data Rate (HDR) software package, mitigates the impact of the rotorblades on the satellite signal to bring high-speed, high-bandwidth capabilities to helicopter operators around the world.

**WHO CAN USE IT?**

- Search and Rescue
- Oil and gas
- Law enforcement
- Emergency medical services
- VIP/executive transport
- Military

**WHAT ARE THE KEY BENEFITS OF THE SYSTEM?**

- Consistent, reliable worldwide coverage
- Capable of up to 700 Kbps
- Services over water and in remote locations
- Scalable, lightweight equipment
- Beyond Line of Sight capabilities

**WHAT ARE THEY USING IT FOR?**

- Medical information
- Email
- Web
- Video conferencing
- Text messages
- Weather information
- GPS/positioning information
- Voice
