

EXPERIENCE SEAMLESS CONNECTIVITY WITHOUT BREAKING THE BANK

JET CONNEX KA-BAND CONNECTIVITY

Putting high-quality video at your passengers' fingertips used to require a lot of bandwidth and a big budget. Not anymore. Business jet operators don't need to subscribe to the most expensive top-tier data plan to provide video streaming access to the cabin. New tools from GoDirect™ will help you control your costs.

If you use the Jet ConneX service with GoDirect™ you can control the amount of bandwidth streaming video consumes. This enables you to use less-expensive data plans while still delivering a superb passenger experience.. This provides a significant cost benefit and ensures that adequate bandwidth is available for all onboard network, voice and data demands.
