

SKY CONNECT TRACKER III

is the industry's proven solution for lightweight satellite communications. Worldwide tracking, 2-way messaging, and telephone services are combined with flight data monitoring capabilities to meet new mandates

BENEFITS FOR HELICOPTER OPERATORS

Enhances **safety and operational efficiency** for all aircraft types

Least-cost methods for full-time fleet surveillance to **communicate location and status, supporting air ambulance, search and rescue, firefighting** and mission-oriented operational environments

Data collected for ground maintenance and operations teams help **reduce aircraft downtime and increase mission availability**

Simultaneous voice, tracking and messaging functions assure 100% operational control and fleet situational awareness **even in the most remote areas – anywhere in the world**

Pre-formatted messages and fast-fill forms make text messaging an effective way for crews to **communicate accurately for routine updates, weather, and dispatch assignments**

All position reports, alerts, and text messages are encrypted **using secure data protocols**

Innovative alerting system **can automatically send a final position/status report** after shutdown or electric bus power loss

Anyone **on the ground** with **authorized access** can exchange text messages with the aircraft

Sky Connect Tracker III can integrate with **Honeywell's Health and Usage Monitoring System (HUMS)**, allowing the system to send **real-time aircraft health status and maintenance alerts**
